

General Changes To ECS Resources

Fall 2020

ECS Accounts will no longer be used.

- Any authentication that required an **ECS account** will now require a **CSUS account**.
- There will be **no new** ECS accounts made.

Files on Gaia

- "My Home Space on Gaia" shortcut (Windows desktop shortcut), UNIX file home when you SSH to Athena.
- Files on Gaia will still remain, however, **backup is recommended**.
- Campus maintained **U:Drive** will **replace** the *functionality* of Gaia.

Hydra Users

- Users will still be able to use remote desktop(RDP) and use applications like before, but the method (like the name of the server) will **change**.

Athena Users

- Similar to Hydra changes, method of connecting will **change** but functionality remains the same.

ECS Cloud/Email

- OneDrive** will replace **ECS Cloud**.
- Backup is **reccomended**.
- ECS emails will **redirect** to CSUS email.

ECS Website

- ECS website** will phased out.
- Methods of replacement** and migration are still being determined.

Files on Voyager

- To share files, please use **OneDrive** then create links to share to others.
- Voyager Lab will be **replaced** by another campus resource.

CSUS OneDrive

- Connect with your **CSUS account** and share large files with other students.

(OneDrive includes **1 TB** of drive space)

U:Drive

- Campus maintained personal folder associated with your **CSUS account**.
- Redirect** desktop files when logging into other machines.
- Can be **networked mapped** onto your personal device.

Campus VPN

- Students will **need VPN access** to connect to campus resources.
- There will be campus **VPN** application.
